SUMMARY

Computer Applications student with a strong foundation in programming and web technologies. Skilled in developing responsive and user-focused web applications. Eager to apply technical skills in real-world projects and continuously enhance problem-solving abilities.

EDUCATION

Institute of Management Studies, Ghaziabad Bachelor of Computer Applications (BCA)	2023 – 2026
D.S.R. Modern School Senior Secondary (XII), CBSE	2022 – 2023
D.S.R. Modern School Secondary (X), CBSE	2020 – 2021

SKILLS

Programming	Python, C, C++
Web Technologies	HTML5, CSS3, JavaScript, React.js, Flask
Databases	MySQL, SQLite
Tools & Platforms	VS Code, Git, GitHub, Canva

INTERNSHIP EXPERIENCE

Intern – IMSUC Ghaziabad — Data Analysis	Jun 2025 – Jul 2025
– During my internship at IMSUC Ghaziabad, I worked on data analysis projects involving datasets containing over 5,000 records . I performed Exploratory Data Analysis (EDA) using Python, Pandas, and NumPy to identify patterns, trends, and insights from raw data. I cleaned and preprocessed datasets by handling missing values and duplicate records, improving overall data quality and accuracy. Additionally, I applied correlation analysis and basic statistical techniques to identify relationships between variables and support data-driven decision-making.	

PROJECTS

Quick Bite – Online Food Ordering System	HTML5, CSS3, JavaScript, Python (Flask), SQLite
- Developed a full-stack online food ordering platform with secure user authentication, menu browsing, food search, and responsive user interface. - Implemented shopping cart functionality, dummy payment system, and order placement workflow, enabling users to seamlessly place and manage orders. - Built a real-time order tracking system and order history module to allow users to monitor order status from placement to delivery. - Designed an Admin Dashboard for managing food items, customer orders, menu updates, and database operations using Flask and SQLite.	
NariKavach – Women Safety & Emergency Response Network	HTML5, CSS3, JavaScript, Google Maps API
- Developed a Women Safety & Emergency Response Platform featuring dedicated User Dashboard and Family Dashboard for real-time safety monitoring and emergency management. - Implemented SOS Alerts, Live Location Tracking, and Emergency Contact Management, enabling users to instantly notify family members during critical situations. - Integrated Google Maps API for real-time location sharing and identification of nearby Police Stations, Hospitals, and emergency services. - Built a Real-Time Family Chat System, AI-Powered Chatbot, and WhatsApp Alert Integration to facilitate instant communication, safety guidance, and emergency assistance.	

CO-CURRICULAR

- Social Media Handler, Network Club – Managed social media posts and supported content design using Canva.
- Volunteer, GitHub Workshop – Assisted participants in repository setup, commits, and version control basics.
- Volunteer, Blind Coding Event – Supported event coordination and participant management during the activity.

CERTIFICATIONS

- Data Analytics – Coursera
- Machine Learning with Python – IIT Kanpur
- Database Foundation – Oracle
- Python for Data Science & AI – Coursera
